THIS CHANGE ORDER PROVIDES FOR:

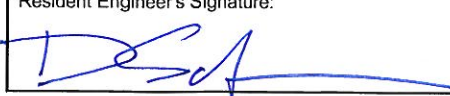

Preparing and testing seven (7) 75 mm Type 1 suspender rope samples, and submitting a report.

At Panel Points 78, 80, 92, and 94 on the North and South Cables, the suspender ropes are not centered in the cable band grooves, resulting in the ropes bearing against one side of the groove. As a result, the lay (position) of some of the wires in the suspender rope was disturbed during load transfer. This change order will direct the Contractor to prepare and test seven samples which replicate the field condition of the disturbed wire. These samples will be tested to confirm the adequacy of the wire as is. This information will then be submitted by the Contractor to the Department for final approval.

The total cost of this change order is \$136,635.00 lump sum, which can be financed from the contingency fund. A detailed cost estimate is on file.

No time adjustment is warranted as this change order does not affect the controlling operation.

This change order has concurrence from William Casey (Supervising TE), Rich Foley (HQ Oversight), Wenyi Long (Bridge Design), and Jing Chen (District Design).
